

Khatiyā No. 500 (revised form) — Working Translation

Mouza Jalalpur, J.L. No. 119, Rajnagar, Moulvibazar

This is a **working translation and summary** of a handwritten khatiyā on the সংশোধিত (revised) government form. The hand is difficult to read and this is a brief record, so most readings below are provisional. Items marked **[?]** require verification against the original. It is also not yet established whether the copy held is a certified (জাবেদা) copy or an informal one.

Why this record matters

This is a Jalalpur holding standing in the sole name of the late Nurul Islam, separate from the jointly-held property. It bears directly on two open questions: which branch of the family the sales recorded in the 2018 ledgers belong to (tracker item b11), and the mutation status of the cousins' side (tracker item b14).

Items needing verification

- Whether the copy held is certified
- Exact dag numbers and total area
- Whether this khatiyā is still current or has been superseded
- Its relationship to the dags covered by Mutation 1157
